* ICMR Approved Covid 19 Testing Registration No. :- CRLAAHCCNMH

- 1.The COVID-19 RT-PCR test is a real-time reverse transcription polymerase chain reaction (RT-PCR) test for the qualitative detection of nucleic acid from SARS-CoV-2.
- 2.Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.
3. Positive results are indicative of the presence of SARS-CoV-2 RNA; clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status. Positive results do not rule out bacterial infection or co-infection with other viruses..
4. Covid-19 test conducted as per kit approved by ICMR
5. Kindly consult physician or authorized hospital for appropriate follow up.
